

Licensing Database

Our licensing database manages compliance obligations by reviewing licensing and gathering market access requirements into a single secure electronic database, accessible by your teams anywhere in the world, and updated with relevant policy or regulatory changes.

Our Approach

Audit existing licences

Audit existing licences to determine expiration dates, compliance fees, regulatory obligations, and compare national practices.

Create accessible database

Create a secure electronic database, providing a single point of access of regulatory information for the provision of services.

Monitor compliance

Align new and old licences with your commercial objectives and use the database to monitor changes in each jurisdiction.

Real Time Support

- At any point, our team can provide strategic advice on best practice regarding renewals, exemptions, and approval.
- We identify licences subject to renew, file applications for renewals, and process renewal fees.
- We liaise with local points of contacts where required, based on a network of trusted partners around the world.

Operations

- Our databases are managed by industry-certified experts.
- Communications are encrypted and the database is accessed through multi-factor authentication, with regular back-ups made to a secure server.
- Support can be accessed at any time.
- The database can be hosted online, allowing simple, global access to the information and the ability to instantly update any part of it.

About Access Partnership

Access Partnership is the world's leading public policy consultancy for the tech sector. We monitor and analyse global trends for the risks and opportunities they create for technology businesses and identify strategies to mitigate those risks and drive the opportunities to our clients' advantage. Our team uniquely mixes policy and technical expertise to optimise outcomes for companies operating at the intersection of technology, data and connectivity. Our global team of 60 staff work in London, Brussels, Washington, Dakar, Abu Dhabi, and Singapore.
